HOT SHEET METAL FORMING OF HIGH-PERFORMANCE STEEL

CHS²

June 15-17, 2009, Luleå, Sweden

Proceedings

2nd International Conference

**HOT SHEET METAL FORMING
OF HIGH-PERFORMANCE STEEL
CHS²**

June 15-17, 2009, Luleå, Sweden
Proceedings

Edited by

Prof. Mats Oldenburg, Luleå University of Technology, Sweden

Prof. Kurt Steinhoff, University of Kassel, Germany

Prof. Braham Prakash, Luleå University of Technology, Sweden

Table of contents

Materials I

Dong Wei Fan, Han Soo Kim and Bruno C. De Cooman

Physical metallurgy of hot press forming coating degradation suppression7

Nak-Hyun Kim, Ki-Young Kwon and Chung-Gil Kang

**The effect of cooling rate on mechanical properties
in hot press forming of Al-Si coated 22MnB5 sheet
and its theoretical temperature prediction.....17**

Kurt Steinhoff, Nicolas Saba, Manuel Maikranz-Valentin and Ursula Weidig

Optimized processes and products in hot sheet metal forming29

Modelling & Simulation I

Tobias Olsson

**An LS-DYNA material model for simulations of hot stamping processes
of ultra high strength steels43**

Laurent Durrenberger, Joël Wilsius and Philipp Hein

**Impact of the constitutive model on the hot-forming
numerical predictions of Usibor1500P51**

*Iñigo Aranguren, Maite Santos, Sonia Varela,
Beatriz González, Marian Gutiérrez and Borja Fernández*

**Evaluation and optimization of the use of simulation software codes
for the design of a tooling for a hot stamped industrial part.....59**

Thomas Schönbach and Michael Kerausch

**Effective usage of simulation techniques
for the layout of hotforming processes.....69**

Materials II

Hans-Gerd Lambers, Sergej Tschumak, Hans Jürgen Maier and Demircan Canadinc

**Tensile properties of 51 CrV 4 steel in
martensitic, bainitic and austenitic state77**

<i>Hermann Autenrieth, Norman Herzig, Jürgen Hoffmeister, Volker Schulze and Lothar W. Meyer</i>	
Influence of loading state on ductile failure behaviour of AISI 1045 in a normalized state and numerical description and application	87
<i>Kazuhisa Kusumi, Shuji Yamamoto, Tetsuro Takeshita and Masayuki Abe</i>	
The effect of martensitic transformation on the spring-back behaviour of the hot stamping	97
<i>Alexander Bardelcik, Mary Wells and Michael Worswick</i>	
The effect of cooling rate on the mechanical properties and energy absorption potential of hardened boron steel	105
<i>Ingrid Picas, Ricardo Hernández, Daniel Casellas and Isaac Valls</i>	
Cold cutting of microstructurally tailored hot formed components	115
<i>Thorsten Labudde and Wolfgang Bleck</i>	
Formability characterisation of press hardened steels	127

Process Design I

<i>Hyunwoo So, Hartmut Hoffmann and Rolland Golle</i>	
Blanking of press hardened ultra high strength steel	137
<i>Stéphane Graff and Franz-Josef Lenze</i>	
Monitoring the hot stamping process: From hot stamping- to crash-simulations	147
<i>Hossein Karbasian, Alexander Brosius and A. Erman Tekkaya</i>	
Influence of process control on geometrical and mechanical properties of hot stamped parts	157
<i>Ignacio García Acha, Borja Fernández, Agustín Sanz, Iñigo Aranguren, Beatriz González and Sonia Varela</i>	
Die Development from the part concept to the production line	165
<i>Ralf Kolleck, Jens Aspacher and Robert Veit</i>	
Efficiency of hot forming processes	173

Process Design II

- Reimund Neugebauer, Angela Göschel, Andreas Sterzing and Frank Schieck*
**Gas forming with integrated heat treatment for high performance steel -
a solution approach for press hardened tubes and profiles**181
- Ryan George, Alexander Bardelcik and Michael Worswick*
**Development of a hot forming die to produce parts with
tailored mechanical properties – Numerical study**189
- Kent Eriksson and Mats Lindman*
Press hardening - opportunity or limitation?199
- Marc Decker and Hubertus Valpertz*
Hot forming trends – New technologies for existing systems.....205
- Franz-Josef Lenze, Sascha Sikora, Dirk Sauer and Oliver Straube*
Materials and process developments on the field of hot stamping technology211
- Takehide Senuma, Hideaki Magome, Akihiro Tanabe and Yoshito Takemoto*
New hot stamping technology characterized by its high productivity221

Modelling & Simulation II

- Hans-Åke Häggblad, Daniel Berglund, Karl-Gustaf Sundin and Mats Oldenburg*
**Formulation of a finite element model for localisation and
crack initiation in components of ultra high strength steels**229
- Per Salomonsson and Mats Oldenburg*
Investigation of heat transfer in the press hardening process239
- Göran Lindkvist, Hans-Åke Häggblad and Mats Oldenburg*
**Thermo-mechanical simulation of high temperature
formblowing and hardening**247
- Lionel Morangay, Gonzalo de los Rios, Said Mamouri, Erwan Beauchesne and Subir Roy*
**Recent advances in hot sheet metal forming simulation
using RADIOSS® explicit finite element code**255

Products

<i>Stefan Goedicke, Stefan Sepeur, Christine Breyer, Maria Köyer and Jörg Lewandowski</i> Development of an anti scaling coating with active corrosion protection for hot sheet metal forming	265
<i>Thomas Stoehr, Juergen Lechler and Marion Merklein</i> Investigations on different strategies for influencing the microstructural properties with respect to partial hot stamping	273
<i>Josef Faderl, Siegfried Kolnberger, Thomas Kurz, Gerald Luckeneder, Thomas Manzenreiter and Martin Rosner</i> phs-ultraform® – Continuous galvanizing meets press-hardening	283
<i>Daniel Berglund</i> Hot Stamped components with tailored properties – Simulation and validation of Product Performance	293
<i>Lars Sandberg, Stefan Hortlund and Göran Berglund</i> Formblowing and Hardening of an A-pillar	303
<i>Michael Braun and Christian Fritzsche</i> Joining of hot-formed steel	313

Materials III

<i>Rolf Schwartz and Harald Lehmann</i> Developments in the field of heat treatment systems for hot-form hardening lines	323
<i>Isaac Valls, Begoña Casas and Noemí Rodríguez</i> Improving die durability in Hot Stamping and Hard Cutting	331
<i>Esa Vuorinen, Lin Wang, Sanja Stanojevic and Braham Prakash</i> Influence of retained austenite on rolling-sliding wear resistance of austempered silicon alloyed steel	339
<i>Jens Hardell and Braham Prakash</i> Tribological properties of PVD coated and plasma nitrided hot forming tool steel during sliding against UHSS at elevated temperature	349
